

PRESS RELEASE

Corvette C6 OBDII Data Logging

Racepak Data Systems announces the release of their Corvette C6 (2006 to present) GMLAN interface Vnet module. Designed for use with any of Racepak's Vnet series of data loggers (V300, V300SD, V500, G2X, G2X Pro, IQ3 Logger Dash) this module provides easy access to the following data transmitted via the GMLAN network:

1. Engine RPM
2. Throttle Position
3. Throttle Pedal Position
4. Oil Temperature
5. Water Temperature
6. Transmission Temperature
7. Intake Temperature
8. Battery Voltage
9. Wheel RPM (all four wheels)
10. Yaw
11. Torque
12. Horsepower
13. Brake Pedal Position

When utilized with any of Racepak's optional GPS based series of data loggers (G2X, G2X Pro, IQ3 Logger Dash) customers have a complete data system, capable of recording, downloading and graphing both the GMLAN data and:

1. Lap Time / Lap Number / Predictive Lap Time
2. Accel G / Lateral G
3. Track Mapping
4. GPS Speed

With a single cable routing data from the C6 Vnet module to the optional Racepak data logger, installation is simple, yet provides a substantial amount of data at an affordable price.

Corvette C6 GMLAN interface Vnet module: \$499.00 retail. Part number 230-VM-EFIC6
